## EXAMINER'S COMMENT AND STATEMENT OF REASONS FOR ALLOWANCE

### *Examiner's Amendment*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended by the examiner as follows: In the Specification, the paragraph starting on page 2, line 5, as follows:

--This application is a continuation of copending U.S. patent application titled "METHOD OF AUTOMATIC STANDARDIZED CALIBRATION FOR INFRARED SENSING DEVICE." Application No. 10/045,302, filed October 23, 2001, now Patent No. 6,639,209, the disclosure of which is hereby incorporated by reference. Application No. 10/045,302 claims the benefit of an earlier filed copending provisional patent application titled "REMOTELY MANAGED AUTOMATIC DISPENSING APPARATUS AND METHOD," Application No. 60/242,898, filed October 24, 2000, the disclosure of which is hereby incorporated by reference. Application No. 10/045,302 also claims the benefit of an earlier filed copending provisional patent application titled "REMOTELY MANAGED AUTOMATIC DISPENSING APPARATUS AND METHOD," filed February 8, 2001.--

The reason for the above amendment was to update the status of the parent application.

### *Allowable Subject Matter*

2. Claims 28-31 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 2878

Regarding independent claim 28, the prior art the prior art does not disclose or fairly suggest a method or apparatus for calibrating infrared sensing devices including at least steps of emitting and detecting infrared radiation from an infrared emitter and detector, determining an emitter input value to cause the detector to detect infrared radiation within a specified output range, and calibrating multiple control modules based on the emitter input value.

The examiner notes that while it is known in the art (for example Parsons *et al.* -- US 5,984,262) to utilize calibration methods and apparatus wherein the input value to an infrared emitter is adjusted so as to produce an detector output value within a predetermined range (col. 5, lines 18-33), the prior art does not disclose or fairly suggest using a separate select infrared emitter/detector pair for calibrating one or more control modules.

The remaining claims are allowed on the basis of their dependency.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert J. Gagliardi whose telephone number is (571) 272-2436.

The examiner can normally be reached on Monday thru Friday from 9 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Porta can be reached on (571) 272-2444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
